Performance Evaluation 18 (1993) 264
North-Holland

Author Index Volume 18 (1993)

(The issue number is given in front of the page numbers)

Baiocchi, A., Accurate formulae for the loss probability evaluation in a large class of queueing systems (2) 125–132
Baynat, B. and **Y. Dallery**, A unified view of product-form approximation techniques for general closed queueing networks (3) 205–224
Billington, J. and **B. Henderson**, Analysis of Petri net performance models (1) 1– 2
Boxma, O.J., H. Levy and **J.A. Weststrate**, Efficient visit orders for polling systems (2) 103–123

Campos, J. and **M. Silva**, Embedded product-form queueing networks and the improvement of performance bounds for Petri net systems (1) 3– 19
Chien, C., Seek distances in disks with dual arms and mirrored disks (3) 175–188
Ciardo, G. and **K.S. Trivedi**, A decomposition approach for stochastic reward net models (1) 37– 59
Ciardo, G., PNPM'91—4th International Workshop on Petri Nets and Performance Models (1) 91–100

Dallery, Y., *see* **Baynat, B.** (3) 205–224
Donatelli, S., Superposed stochastic automata: a class of stochastic Petri nets with parallel solution and distributed state space (1) 21– 36

Falin, G., On the performance characteristics of a TASI system (2) 141–148
Fischer, W. and **K. Meier-Hellstern**, The Markov-modulated Poisson process (MMPP) cookbook (2) 149–171

Gail, H.R., G. Grover, R. Guérin, S.L. Hantler, Z. Rosberg and **M. Sidi**, Buffer size requirements under longest queue first (2) 133–140
Georganas, N.D., *see* **Li, M.** (3) 225–235
Grover, G., *see* **Gail, H.R.** (2) 133–140
Guérin, R., *see* **Gail, H.R.** (2) 133–140

Hantler, S.L., *see* **Gail, H.R.** (2) 133–140
Haverkort, B.R., Approximate performability and dependability analysis using generalized stochastic Petri nets (1) 61– 78
Henderson, B., *see* **Billington, J.** (1) 1– 2

Kushwaha, R., Methodology for predicting performance of distributed and parallel systems (3) 189–204

Levy, H., *see* **Boxma, O.J.** (2) 103–123
Li, M. and **N.D. Georganas**, ACAL—An efficient adaptive chain oriented algorithm for the analysis of multiple chain closed queueing networks (3) 225–235
Lindemann, C., An improved numerical algorithm for calculating steady-state solutions of deterministic and stochastic Petri net models (1) 79– 95

Meier-Hellstern, K., *see* **Fischer, W.** (2) 149–171

Rosberg, Z., *see* **Gail, H.R.** (2) 133–140

Sasaki, G.H., Input buffer requirements for round robin polling systems (3) 237–261
Sidi, M., *see* **Gail, H.R.** (2) 133–140
Silva, M., *see* **Campos, J.** (1) 3– 19

Trivedi, K.S., *see* **Ciardo, G.** (1) 37– 59

Weststrate, J.A., *see* **Boxma, O.J.** (2) 103–123
